## SUMMARY

Front-end web developer utilizing my healthcare background to create inclusive and user friendly apps, built with best practices in mind. Recently earned a certificate in full stack development from the University of Minnesota Coding Bootcamp. Some of my strengths include communication, troubleshooting/testing and creativity.

## TECHNICAL SKILLS

**Front-End:** JavaScript, CSS, React, HTML

**Back-End:** NoSQL, MongoDB, GraphQL, MySQL, Node, Express

## PROJECTS

**Apex-Filter** | <https://github.com/kilimba7/apex-filter> | <https://gamer-6.herokuapp.com/>

- Connects users looking for a teammate to a filterable player pool
- Homepage displays user created cards that hold pertinent information
  - These range from rank, platform, what hours they play at and if they have a mic
- I worked on the Apollo server, models, and some of the styling for the profile page
- Technologies used include GraphQL, MongoDB, React, and Tailwind for the CSS

**My-Recipe** | <https://github.com/kilimba7/Recipe-Me> | <https://community-recipe-calendar.herokuapp.com/>

- Simple interface with easy-to-use input forms that allow users to submit links to online recipes
- I was responsible for the routes/controllers and handlebars
- Some of the technologies used include Node.js, Express.js, Handlebars.js, MYSQL/Sequelize, RESTful API, and Bulma for our CSS framework.
